What recommendations do we share to date from last year's end-of-year report to carry over into this year? What clear steps should we take to continue to work on the other areas of concern about SAT? Are we going to recommend totally what needs to be done or are we actually going to do some of things we are suggesting? (the video is one example)
- Classroom Climate discussion

Note: This will be a **Zoom meeting**, and **we may go a little longer** pending where we are in our discussions but no longer than 4
