

Educator Preparation Accountability

The School of Education and Health Sciences reviews data on our educator preparation programs consistent with the CAEP Accountability Measures for educator preparation providers. The measures contained in this report give evidence of our programs' impact on the P-12 schools where our program completers serve. In this report, data is shown for both initial and advanced programs of the University of Dayton. Our Initial Programs are those programs which prepare candidates for their initial teacher license, and are housed in the Department of Teacher Education. Our Advanced Programs are those programs which prepare candidates for licensure in administrative or pupil services areas to serve in P-12 schools, housed in the Department of Educational Administration and Department of Counselor Education, respectively. Please see the table at the following link for a list of these programs offered at the University of Dayton: [educator preparation programs](#).

CAEP Accountability Measures

- **Measure 1 (Initial): Completer effectiveness.**

Data must address:

- (a) completer impact in contributing to P-12 student-learning growth **AND**
- (b) completer effectiveness in applying professional knowledge, skills, and dispositions.

- **Measure 2 (Initial and Advanced): Satisfaction of employers and stakeholder involvement.**

Data provided should be collected on employers' satisfaction with program completers.

- **Measure 3 (Initial and Advanced): Candidate competency at completion.**

Data provided should relate to measures the EPP is using to determine if candidates are meeting program expectations and ready to be recommended for licensure.

- **Measure 4 (Initial and Advanced): Ability of completers to be hired** (in positions for which they have prepared.)

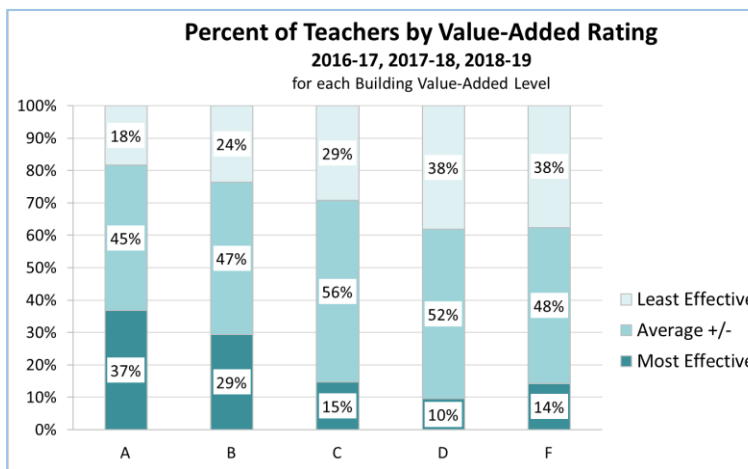

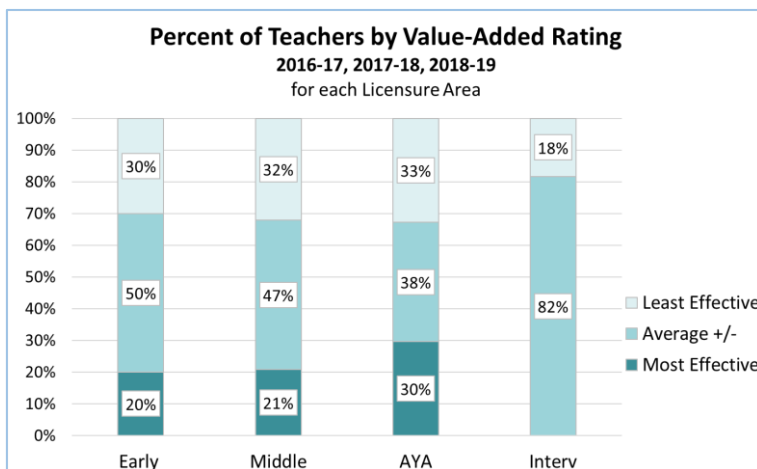

Impact on P-12 learning and development

Value-added ratings are provided for Ohio public-school classroom teachers by the Ohio Department of Education. Teachers are rated based on Elementary and Middle School Tests (Grades 4-8) and high school End-of-Course Tests. The ratings indicate the teacher’s impact on their students’ test scores, and are disaggregated by characteristics of the school district and building where they teach.

*Evaluation data for the 2019-2020 and 2020-2021 school years will be limited or not available due to Ohio's ordered school-building closure and subsequent emergency legislation addressing the coronavirus pandemic-related issues (House Bills 197 and 404).

3-Year Trends

Indicators of teaching effectiveness

Ohio Teacher Evaluation System (OTES)

Ohio's system for evaluating teachers (OTES) provides educators with a detailed view of their performance, with a focus on specific strengths and opportunities for improvement. Ratings incorporate teaching observations and performance based on state value-added measures. Data are reported each academic year for teachers by the year their license was effective. Results below are aggregated for each academic year from all teachers having the initial 4-year Resident Educator license.

Academic Year	License Term	University of Dayton				Statewide			
		# Accomplished	# Skilled	# Developing	# Ineffective	# Accomplished	# Skilled	# Developing	# Ineffective
2020-21*	Year 4	30	29	N < 10	N < 10	932	1,532	32	N < 10
	Year 3	12	22	N < 10	N < 10	694	1,513	48	N < 10
	Year 2	16	39	N < 10	N < 10	469	1,748	90	N < 10
	Year 1	N < 10	22	N < 10	N < 10	104	1,153	130	N < 10

2017-18	Year 4	37	32	N < 10	N < 10	1,410	1,401	212	N < 10
	Year 3	39	18	N < 10	N < 10	1,122	1,356	226	N < 10
	Year 2	25	27	N < 10	N < 10	756	1,296	290	N < 10
	Year 1	11	19	N < 10	N < 10	474	928	306	N < 10

* OTES 2.0 is to be implemented in school districts beginning 2020-21 and by 2021-22. Each teacher will be evaluated according to Ohio Revised Code and the Ohio Teacher Evaluation Framework, which is aligned with the Ohio Standards for the Teaching Profession adopted under state law. Using multiple factors set forth in the Framework, the teacher's Final Holistic Rating will be based upon a combination of informal and formal observations and supporting evidence using the Teacher Performance Evaluation Rubric.

** Ohio's ordered school-building closure and subsequent emergency legislation addressing the coronavirus pandemic-related issues (House Bill 197 of the 133rd General Assembly) had substantial impacts on state testing during the 2019-2020 school year. As a result, the OTES/OPES and Value-Added sections of this report will include limited or no data.

Satisfaction of Employers

Employer Survey

Prior to 2022, the School of Education and Health Sciences (SEHS) administered an annual survey aligned with its unit outcome goals and targeted to K-12 school officials who employ completers of all our EPP programs. The University of Dayton’s annual Educator Interview Day is jointly hosted by the Office of Career Services and SEHS educator preparation programs. School representatives attending the event were presented an online survey after the event to provide feedback about the event, and the completers they have employed.

Beginning in 2022, the statewide Ohio EPP Employer Survey will be used to gather feedback from employers of our EPP completers. The survey instrument will be provided at the Educator Interview Day, and a link to the survey shared with the departmental advisory boards for initial and advanced educator preparation programs.

The University of Dayton uses the feedback from our employers to promote the benefits of our program, as well as to address areas that employers indicate are areas to continue to improve. Technology needs, classroom management, and using value-added measures for K-12 student growth have been addressed.

SEHS Employer Survey		Mean Response		
<i>Aligned with unit outcomes</i>		<i>% of Scale (1 to 5)</i>		
SEHS Unit Outcome		2019	2020	2021
Scholar Practitioner	Understanding of the learning and development of the students/clients they teach/serve or the learning community in which they lead?	91%	92%	89%
Embrace Diversity	Respect for the diversity of the students/clients they serve or the learning community in which they lead?	91%	92%	90%
Building Community	Ability to create learning/professional communities that promote high levels of achievement for all students/clients?	84%	94%	89%
Critical Reflection	Commitment to reflection on professional practices related to professional goals?	88%	94%	91%
	How likely would you be to recommend them for retention?	99%	90%	83%
	How likely would you be to recommend them for promotion?	96%	97%	81%
Number of Responses		N=25	N=16	N=12

Initial Programs

Professional Knowledge (Ohio Assessments for Educators – OAE) – Completer Results

Performance-Based Assessments (edTPA®) – Completer Results

The University of Dayton initial licensure programs use the edTPA® national performance-based assessment as a measure of candidates’ competence. A cut-score has been in place for successful completion of the program. Through 2019-20, the cut score for completing the teacher preparation program was set for a total score of 35. That was increased to 37 in 2020-21 to align with the state of Ohio passing score as an alternative to the Assessment of Professional Knowledge for an Ohio teaching license. (The cut scores are adjusted for the edTPA for World Language, which has fewer sections, to 30 prior to 2020-21 and increased to 32 in 2020-21 to align with the state passing score.)

On May 26, 2020, the chancellor of the Ohio Department of Higher Education determined the edTPA to be a nationally recognized and scored performance-based assessment, and effective July 1, 2020, successful completion of the edTPA to be an allowable alternative to the Assessment of Professional Knowledge (OAE-APK) for an Ohio teaching license issued by the Ohio Department of Education. Beginning 2020-21, the pass rate reported will include the edTPA (passing score as outlined [here](#)), and an overall pass rate combining the final OAE or edTPA results.

¹Initial Licensure

Initial licensure employment rates are determined from the office of Career Services Flyer First Destination Survey. The data show the percent responding who are employed within six months of completing a teacher preparation program. Rates are determined for employment in any position in the field of Education, and in a teaching position in a public or private school. Since many of our initial licensure completers get jobs teaching in other states, or in private schools, this self-reported data from the University of Dayton survey is a clearer representation of our completers, with a consistent knowledge rate above 95%.

²Advanced Licensure

Employment data from the Ohio Dept. of Education is matched to data on licenses granted by the University of Dayton. Employment rates are determined for the percent of UD licensed educators employed in Ohio’s public schools during the reported school year, and for educators employed in a position prepared for, according to the effective year of the approved license. Administrative licenses (principal, superintendent, and CIPD) are typically obtained while a candidate is working in a position required for pursuing the building-level or district-level license.
