

Electro-Optics and Photonics Seminar

Friday September 20, 2019 2:30 pm FH 568

Electro-optics for automotive, aerospace and fire protection

Xiaoxu Niu

Research Scientist (former UD grad student)

Gentex Corporation, Zeeland, MI

Gentex is a global, high technology company with sales of \$1.8 billion per year. It is a unique, profitable company that is vertically integrated in highly automated electronics, CMOS camera development and manufacturing, vacuum coatings, and glass bending and fabrication. Gentex specializes in a broad spectrum of technologies and processes to deliver high quality products to the automotive, aerospace and fire protection industries.
