Breast Pumps: Coverage Information & How to Order

Breast Pumps

Women's Health Care Reform, as of 08/01/2012, covers both manual and mechanical breast pumps. The Women's Health Care Reform stipulates that women can obtain one pumping device per pregnancy; however, Anthem will administer and cover one pumping device per year. If the member has two (2) pregnancies in one year, the additional **purchase** of a breast pump will be covered.

Requirements

- Employees do not need a prescription to purchase the breast pump.
- There are also no regulations that state employees must first get the mechanical pump or lesser model, before purchasing or renting the expensive model.
- A pre-certification is **not** required for getting a breast pump.
- If the member purchases the pump & supplies from an In-Network Durable Medical Equipment (DME) provider, the pump is covered in full, one per year (pregnancy).
 - Typically, the pump will come with the standard supplies when purchased.

Anthem will allow the following replacement supplies (**note: all of these services may not apply to you**):

- TUBING FOR BREAST PUMP, REPLACEMENT
- ADAPTER FOR BREAST PUMP, REPLACEMENT
- CAP FOR BREAST PUMP BOTTLE, REPLACEMENT
- BREAST SHIELD & SPLASH PROTECTOR FOR USE W/ BREAST PUMP, REPLACEMENT
- POLYCARBONATE BOTTLE FOR USE W/BREAST PUMP REPLAST PUMP, REPLACEMENT
- LOCKING RING FOR BREAST PUMP, REPLACEMENT
