

Dear Students,

Parking permits for the 2024-25 school year will be available for purchase beginning at 9:00 a.m. **Monday, July 22.**

Instructions

- Go to <http://parking.udayton.edu>.
- Everyone must apply online.
- Click “Get Permits”. Click “Affiliated Login” and input your University of Dayton username and password. Enter the passcode for “two-factor authentication” and click “next”. Continue through the process until you reach the payment receipt page.
- All citations must be paid.
- First-year resident students are not permitted to bring vehicles to campus.
- Resident students will be given priority according to class. You will have the opportunity to select your parking lot based on **space availability**.
- Apply before the start date of the next class to receive priority.
- Be very careful with your lot selection; You cannot change your lot once you select it.
- When permits are sold out for a particular lot, they will no longer appear available for sale.
- This academic year, UD Parking Services will fully implement automated license plate readers to validate parking authorization on campus. Rather than hang tags, license plates will serve as a vehicle's parking permit. Students must register or update any vehicle(s) they may park on campus at parking.udayton.edu; and park with their license plate facing the drive aisle, so UD Parking Services can effectively identify vehicles permitted to park on campus. Only one vehicle may be on campus at a time.
- Each class can continue to apply for a permit until all permits are sold.
